

Environmental Policy Statement

Environmental Policy Statement

LeisureSK recognises that environmental issues are of fundamental importance both in their own right and as part of a successful and responsible business strategy. Therefore, we are committed to ensuring that the environmental impact of our operations will be minimised by preserving, protecting and improving the environment, and by the prevention of pollution.

LeisureSK will strive to improve its environmental performance, with responsibility for implementation being delegated through line management. We will ensure that the necessary resources are made available to achieve successful environmental management throughout the business.

We will ensure that environmental considerations are taken into account throughout the sphere of operations and in doing so expect the full co-operation and commitment of employees, sub-contractors and suppliers in meeting the requirements of this Policy.

We will:

- Pro-actively and effectively prevent and control all potential sources of pollution or nuisance created by work activities in accordance with our Duty of Care responsibilities. This includes discharges to water, ground contamination, releases to atmosphere and noise pollution.
- Ensure effective emergency planning for control of spillages.
- All waste will be kept to a minimum by pre-planning and recycling, reduction of waste, energy conservation and the segregation of re-usable and recyclable materials.
- Attempt to reduce the leisure centre impact, by ensuring a general state of cleanliness, orderliness and tidiness of the centre and to prevent any adverse effects due to access to the centre and traffic routes.
- Effectively communicate, train and support employees on all environmental issues.

A copy of this Environmental Policy will be prominently displayed at all sites and workplaces and will be made available to all interested parties.
